StudentParticipation - OK

Summary

This object contains information pertaining to student eligibility for and participation in an individualized special program such as special education, ESL, Section 504, etc.

Multiple instances of this object may be transmitted for a particular student because the student may participate in multiple programs and because the details of a student's participation in a given program may change over time. A separate instance of this object must be generated for each program in which the student participates, and the `ProgramType` element is used to identify the particular program. In addition, each time the student's participation profile changes for a particular program, a new instance of this object must be generated with the appropriate value in the `ProgramType` element, the effective date of the new profile in `StudentParticipationAsOfDate`, and a new `RefId`.

SIF_Events are reported for this object.

Object Population and Business Rules

#	Requirement

R1	• **SIF_Request (Batch) Object population logic:**
	1. The student will report no more than 1 active instance of StudentParticipation per ProgramType.
	  a. Infinite Campus doesn't allow overlapping most Program records.
	2. Each eligible record will report a separate StudentParticipation record when the program record was active for at least 1 day in the SIF Zone Year.
	3. Each eligible StudentParticipation record will have a unique RefId. Eligible records align with unique records (Section504, English Learners etc) in Infinite Campus.
	  a. For example: Each eligible Section504 record assigned to a student will have a unique StudentParticipation RefId.
	4. For records with a FreeReduced ProgramType:
	  a. When an eligible School History record exists for a schoolwide provision, and the student has an existing FreeReduced StudentParticipation record in the year:
	    i. The record populating from FRAM will have a ProgramExitDate of 1 day prior to the School History effective date.
	5. When the SIF Zone Year is set to "All Years", and the School History End Year is < the current year, populates the ProgramExitDate with (System Admin>Calendar>Calendar>End Date) from the end-year calendar.

	Alternative Education Record
	
	1. Reports a record for each Alternative Education record on Student Info > Program Participation > State Programs > Alternative Education where all of the following are true:
	  a. Start Date <= the latest calendar End Date in the Zone Year with Exclude from SIF reporting NOT = checked
	  b. Start Date <= current date
	  c. End Date is null or >= the earliest calendar Start Date in the Zone Year with Exclude from SIF reporting NOT = checked

Gifted & Talented Record

      i. *FRNA mapped options are not provided to the State
2. **Student qualifies through the school provision:**
   a. ProgramType/OtherCode = S012:
      i. The School's most recent School History record with an Effective Date <= the current date has:
         1. Provision = 5: CEP
         2. NSLP = checked
