- [Appendix](#)

Summary

This event entity represents the recording of whether a student is in attendance for a school day.

Object Triggering Logic

Action	Business Rule(s)
Post	<p>When a new attendance event is added for a student and the Attendance State Code is mapped to an Ed-Fi code.</p> <ul style="list-style-type: none">• Reports attendance for each school where the student has a Student School Association record.• Attendance date must fall on or between the Enrollment Start and End Dates.• Do not report a record if the any of the following exclusions are present:<ul style="list-style-type: none">◦ School Exclude◦ Calendar Exclude◦ Enrollment State Exclude◦ Enrollment No Show• Local Attendance Codes must be mapped to a State Code in Attendance Office > Attendance Code Setup to be eligible for state reporting.

Delete /Post	A DELETE / POST will be performed if the data element being altered is part of the resource's natural key. A PUT will be performed otherwise.
Put	<ul style="list-style-type: none">• When any of the following information is changed on Enrollment:<ul style="list-style-type: none">◦ Enrollment ID (New Enrollment)◦ Start Date◦ End Date◦ No Show• When any of the following information is changed on Attendance:<ul style="list-style-type: none">◦ Date◦ Attendance Code◦ Comments• Changes to Resource Preferences mappings do NOT trigger. A manual resync must be performed on the resource if mappings are changed.
Delete	<ul style="list-style-type: none">• When the Attendance is deleted.• When the Attendance date is changed to no longer overlap the Enrollment or the configured year.• When the Enrollment is deleted.• When the Enrollment dates are changed to no longer overlap the configured year.• When the Student is excluded in some way.• When a record is in the Ed-Fi Identity Mapping Report but cannot be found on the Campus site.

Required Resources (Upstream)

The following resources must be sent prior to this resource:

- Schools (Pre-populated)
- Students
- Sessions

Dependent Resources (Downstream)

The following resources are dependent on this resource (must be sent after this resource):

- N/A

Error Log

The following are potential Tier 1 (Ed-Fi API generated) or custom (Campus generated) errors you may receive when posting, updating, or deleting this resource. Please keep in mind that the "Error Message" below may not match your exact error message.

Error Message	Possible Causes / How to Fix
400: Validation of ' RESOURCE ' failed. FIELD is required.	An element of the JSON that is required is missing and needs to be added. <ul style="list-style-type: none">• Double check that all bolded data elements below are reporting a valid value and no data elements below are reporting an invalid value.
400: ' RESOURCE ' failed. RESOURCE reference could not be resolved.	A resource that was referenced from a difference resource does not yet exist. <ul style="list-style-type: none">• Resync the resource being mentioned in the error, then resync the errored resource. Alternatively, the resource being referenced may be incorrect. This can happen with Schools and the Ed-Fi School ID being used as an example. Double check the referenced values being sent are valid.

<p>403: Authorization denied. The claim does not have any established relationships with the requested resource.</p>	<p>The key/secret being used does not have permission to send a record for the resource / referenced resource.</p> <ul style="list-style-type: none"> • Double check your API credentials (key/secret). Sometimes specific keys/secrets cannot report specific resources. • The referenced person (student, staff, parent, contact, etc.) has not yet been associated to the key /secret. Resync their "linking" resource (Students Student School Associations, Staffs Staff Education Organization Assignment Associations, etc.) then resync the errored resource. • The referenced person (student, staff, parent, contact, etc.) may not exist in the ODS yet. Resync the "person" resource and the "linking" resource (Students Student School Associations, Staffs Staff Education Organization Assignment Associations, etc.) then resync the errored resource.
<p>404: Failed to delete 'RESOURCE'. Record does not exist.</p>	<p>The attempt to delete a specific Ed-Fi record ID in the ODS failed because it did not exist.</p> <ul style="list-style-type: none"> • This error can be ignored. The ID was cleared from the Ed-Fi Identity Mapping Report and will not attempt to delete again.
<p>409: A natural key conflict occurred when attempting to create a new resource 'RESOURCE' with a duplicate key.</p>	<p>The Ed-Fi API has a natural key system alongside a standard REST ID system. This error is often protecting against the erroneous creation of a duplicate record in the API. However, it may also indicate that the natural key requirements of the Ed-Fi API have not been satisfied, and the key needs to be modified.</p> <ul style="list-style-type: none"> • Check for duplicate data in your Campus site. If no duplicate data can be found, report the issue to Campus Support. <ul style="list-style-type: none"> ◦ This can be caused by numerous issues. Our code may be attempting to send duplicate records when it should not. The natural key (bolded fields below) may not be unique enough to satisfy Ed-Fi requirements in all cases. Most times this error will require a code change to fix.
<p>409: The resource (or a subordinate entity of the resource) cannot be deleted because it is a dependency of the 'RESOURCE' entity.</p>	<p>The resource that the application is attempting to delete is referenced from another entity.</p> <ul style="list-style-type: none"> • Use the Delete Tool to delete the referenced resource in the error message. Then retry the delete on the original resource that errored.

500: Internal Server Error.	<p>Something unexpected happened and no specific error message could be returned.</p> <ul style="list-style-type: none"> • This issue usually occurs when the ODS is having issues. Confirm that there are no issues with the ODS the data is being sent to and then attempt to retry the errored record. • Contact Campus Support if 500 errors continue to occur, can be replicated consistently, and the ODS the data is being sent to has no ongoing issues. <ul style="list-style-type: none"> ◦ There is a chance that Campus Ed-Fi code is sending an invalid JSON request resulting in the 500 error. ◦ There is a chance that an Ed-Fi Data Standard / API bug is causing the issue. ◦ Investigation is needed in these cases as there are many different potential causes.
-----------------------------	--

Object Data Elements Logic

Data element labels below in **BOLD** are part of the natural key of this resource and are required data elements for the record to send through Ed-Fi.

- The Mandatory / Conditional / Optional column indicates what the state requires for each data element. For Core Ed-Fi connections, it indicates what the data standard requires for each data element.

	Data Element Label	Business Rule(s)	Mandatory (M) Conditional (C) Optional (O)	Data Source GUI Path	Database Field	Uses Template Logic (✓ / ✗ / EXT)
1	attendanceEventCategoryDescriptor (string)	<p>A code describing the attendance event, for example: <i>Unexcused absence</i>, <i>Excused absence</i></p> <hr/> <p>1. Reports the Ed-Fi code mapped to the state code associated with the Attendance Excuse/Status combination</p> <p>a. Multiple events of the same Ed-Fi code will be aggregated into a single event for the day</p> <p>2. See eventDuration field for additional information on reporting this resource</p>	M	Attendance	Attendance.status Attendance.excuse AttendanceExcuse.stateCode AttendanceCheckInOut.attendanceCheckInOutID	✗
2	eventDate (date)	<p>Date for this attendance event.</p> <hr/> <p>Reports the Date being reported.</p>	M	Attendance	Attendance .date AttendanceCheckInOut .timestamp	✓

3	schoolReference (<i>reference</i>)	<p><i>A reference to the Schools resource associated with the Student School Attendance Event being reported.</i></p> <hr/> <p>Reports the fields that are part of the Natural Key for the Schools resource.</p>	M	N/A	N/A	✓
4	sessionReference (<i>reference</i>)	<p><i>A reference to the Sessions resource associated with the Student School Attendance Event being reported.</i></p> <hr/> <p>Reports the fields that are part of the Natural Key for the Sessions resource.</p>	M	N/A	N/A	✓
5	studentReference (<i>reference</i>)	<p><i>A reference to the Students resource associated with the Student School Attendance Event being reported.</i></p> <hr/> <p>Reports the fields that are part of the Natural Key for the Students resource.</p>	M	N/A	N/A	✓

6	attendanceEventReason (<i>string</i>)	<p><i>The reported reason for a student's absence.</i></p> <hr/> <p>Report the first 40 characters of the Comment associated with the Attendance Event Category Descriptor reporting.</p> <ul style="list-style-type: none"> Includes "..." at the end if the Comment is more than 40 characters. Reports from the last Period with a Comment if multiple Comments exist on Periods with the exact same Attendance Event Category Descriptor. Does not report if Comment is NULL. 	O	Attendance	Attendance .comments AttendanceCheckInOut .comments	✓
---	---	---	---	------------	--	---

7	eventDuration (<i>number</i>)	<p><i>The amount of time for the event as recognized by the school: 1 day = 1, 1/2 day = 0.5.</i></p> <p>Reports 0.5 or 1 per the following logic:</p> <ol style="list-style-type: none"> 1. A student's records for the day must sum to an eventDuration of 1. 2. A maximum of 2 records per student per day can report. 3. If no attendance codes were entered for the day and the student is eligible to report for the day, report 1. 4. Else, for each reportable Attendance Event calculate: <ol style="list-style-type: none"> a. Percentage of day student was absent = Total absence minutes/Total rostered instructional minutes <ol style="list-style-type: none"> i. Adjust calculation if any Present Minutes were entered for an absence period (i.e., Total absence minutes/ (Total Rostered Instructional Minutes - Present Minutes) b. Report 1 if student was absent for the full day. c. Report 0.5 if student was absent for at least half of the day, but less than the full day. 	M	Calculated	AttDayAggregation. absentMinutes AttDayAggregation. scheduledMinutes Attendance. presentMinutes	✖
---	---------------------------------	---	---	------------	--	---

8	arrivalTime	This data element is optional and does not report.	O	N/A	N/A	N/A
9	departureTime	This data element is optional and does not report.	O	N/A	N/A	N/A
10	educationalEnvironmentDescriptor	This data element is optional and does not report.	O	N/A	N/A	N/A
11	schoolAttendanceDuration	This data element is optional and does not report.	O	N/A	N/A	N/A
