

Subject

V900156 Dual Alternator Incompatibility

SYSTEM OR PARTS AFFECTED

V900156 UNDERHOOD®70 Air Compressor System for 2025+ Dodge / RAM · 2500 Pick Up, 3500 Chassis Cab, 3500 (Pickup), 4500 (Chassis Cab), 5500 (Chassis Cab).

OVERVIEW

Installing the V900156 system in a vehicle originally equipped with dual alternators is considered “out of application” and will void the VMAC warranty.

- The V900156 UNDERHOOD 70 air compressor system is not compatible with vehicles equipped with dual alternators.
- While the removal of the secondary alternator is physically possible, doing so will negatively impact charging system performance and will cause the vehicle to display error codes.
- RAM dealers are unlikely to reprogram the vehicle to disable the secondary alternator.
