

#SheOwnsHerSuccess when she invests

Preparing and planning today will determine how comfortably you retire.

On average, women tend to live longer, and often look after themselves and their families, so it is important to get on track and move forward on your journey to success.

Stay invested

By starting 10 years earlier, you could triple your retirement value!

Thando saves R1 200 a month in an **Investo Retirement Annuity** from Momentum Savings, increasing the contribution with inflation (6%).

	Retirement value	Real value*
Saving for 20 years	R882 000	R153 000
Saving for 30 years	R2 516 000	R438 000

* Real value is like a magic mirror that shows how much you can buy with your future savings amount. It helps you understand how expensive things will get (because of inflation). It's a way to see how your saved money would look today, even if we look at it many years from now.

Have an emergency fund

Saving 4,5% of your salary for five years in an **Investo Endowment** can provide 80% of your current income increased with inflation, available for three months, in case of a crisis.

A little, invested early, goes a long way.
