

TEACHERS & CURRICULUM DIRECTORS

Infinite Campus is a unique system in that it seamlessly integrates student information and learning management, blurring the lines between an SIS and LMS. This innovative platform empowers teachers to efficiently handle classroom administrative tasks while delivering immersive digital learning experiences to their students.

TEACHING CENTER

- **Attendance** – The Attendance view enables teachers to record classroom absences and tardies, as well as review attendance records maintained by the attendance office.
- **Student Questions** – Through the Student Questions feature, students can pose questions to teachers via the Campus Student Portal, and teachers can respond within the Teaching Center.
- **Engagement Check-In** – The Engagement Check-In tool allows teachers to gauge student well-being and engagement in the classroom and with course curriculum.

GRADE BOOK

- **Grade Book** – The Grade Book allows teachers to create assignments, enter scores, and access a variety of analytics and visual representations of student performance.

PROGRESS MONITOR

- **Progress Monitor** – An alternative to the Grade Book, the Progress Monitor gives a general view at how well students are doing on the academic standards linked to a course and their overall term grades. The Progress Monitor aligns well with schools that have adopted standards-based grading practices.

DIGITAL ASSIGNMENTS

- **Online Submissions** – Online Submissions allow students to submit work through various formats in the Campus Student Portal, such as a text editor, file upload, or via Google Drive.
- **Scoring Rubric** – The Scoring Rubric feature enables teachers to create digital scoring rubrics for students to understand assignment expectations and criteria. Teachers can then use these interactive rubrics for scoring once assignments are submitted.
- **Quizzes** – The Quizzes feature allows teachers to create simple assessments completed through the Campus Student Portal.
- **Discussions** – Discussions in Infinite Campus enable teachers to generate conversation threads within the context of an assignment, leading to a student score, or for initiating general class discussions.
- **District Curriculum Library** – The District Curriculum Library empowers teachers to distribute curriculum resources throughout the district, offering options to assess the effectiveness of content for future reference.
