Summary

Reports disciplinary removal data for all students with disabilities.

- *A record must be created for each disciplinary removal that includes an Event Identifier, the type of removal, response reason (required for unilateral removals to an Interim Alternative Educational Setting [IAES]), the start date of the removal, the duration of the removal, as well as an indication of whether the student was suspended for the remainder of the school year and if the student received services during suspension. This would be "Y" (Yes) only when the Response Code = "OSS." A student can only have one suspension type at a time. If a student receives both an inschool suspension and an out-of-school suspension for the same incident, they must be reported separately with different start dates and Event Identifiers./*

Due Dates

- Districts should begin reporting data **as soon as the SIRS opens in September.**
- Data should be **reported on a frequent and on-going basis throughout the school year**

Scope and Purpose

- Report disciplinary removal data for all students with disabilities.
 - This template defines the Stud_Infr_Resp fact table. This table tracks the details of Disciplinary Actions (Discipline Responses) taken against a Student as the result of a Discipline Incident.
